Job Title: QA Executive (AI Training)

Location: Lucknow (Onsite)
Company: InfoBay.AI
Experience: 1–4 Years
Preference: Immediate Joiners

About InfoBay.AI

InfoBay.AI is an AI solutions company focused on building, optimizing, and scaling next-generation intelligent systems. We specialize in data infrastructure, human-in-the-loop workflows, and AI model optimization, enabling enterprises and AI innovators worldwide to develop accurate, reliable, and scalable AI solutions.

About the Role

InfoBay.AI is looking for a detail-oriented QA Executive to support AI training and data quality projects. The candidate will be responsible for reviewing AI-generated outputs, validating annotations, maintaining quality standards, and ensuring project guidelines are followed accurately.

Mandatory Requirements

- Experience in QA, AI Training, Data Annotation, or Content Review.
- Strong analytical and observation skills.
- Good understanding of AI/LLM training workflows.
- Excellent written and verbal communication skills.
- Proficiency in MS Excel and Google Sheets.
- Ability to maintain accuracy while working with large datasets.

Key Responsibilities

- Perform quality checks on AI training datasets, annotations, and model outputs.
- Review text, image, audio, and video data for accuracy and consistency.
- Identify errors, inconsistencies, and quality issues in AI-generated responses.
- Ensure compliance with project guidelines, SOPs, and SLAs.
- Provide feedback to contributors and operations teams for quality improvement.
- Maintain QA reports, trackers, and performance metrics.
- Collaborate with QA Leads, Project Coordinators, and Operations teams.

Preferred Candidate Profile:

- Prior experience in AI data labeling or LLM training projects is preferred.
- Familiarity with QA tools and annotation platforms is an advantage.
- Detail-oriented, organized, and process-driven mindset.
- Ability to work in fast-paced environments.
